OCTOBER 6, 2023

Dear Resident or Property Owner,

The Village of Kimberly is constructing a concrete bicycle and pedestrian trail in 2024. The trail will be placed on the south side of Kennedy Avenue and the west side of Marcella Street and will connect with existing trail stubs at Cobblestone Lane/Kennedy Avenue, Eisenhower Drive/Kennedy Avenue, and the bike lane/sidewalk on W. Kimberly Avenue. This project is being funded by the Wisconsin Department of Transportation - Transportation Alternatives Program Grant (WisDOT TAP) and the Village of Kimberly.

The project will include some tree removal and crossing driveway aprons within the right of way of businesses on the south side of Kennedy Avenue. Excavation and repaving in concrete will be completed as the trail is constructed in Summer 2024. Exact project schedule and contractor contact information will be shared after the project goes to bid and a contract is awarded in Spring of 2024.

The Village of Kimberly is holding a Public Information Meeting for the project on Monday, October 23rd, 2023, from 4:00 p.m. – 5:00 p.m. in the Evergreen Room at the Village of Kimberly Municipal Complex, 515 W. Kimberly Avenue.

After the Public Information Meeting, all project information will be posted to the Village's project page at <https://www.vokimberly.org/departments/street-department/construction-projects/> to include the presentation from the meeting and any updates as they occur. Questions may be directed to 920-788-7507 or via email at hfemal@vokimberlywi.gov.

Sincerely,

Holly M. Femal, MS, CTRS
